

Tree Identification

Cut out the Tree names and glue them next to the correct tree on page 2.

Cedar

Pine

Maple

Deciduous or Conifer

A Conifer tree is also known as an Evergreen. Evergreen trees don't lose their leaves in winter and provide excellent shelter for birds and animals in the cold weather.

Deciduous trees lose their leaves in the Autumn. Many of these trees' leaves turn bright colours before falling to the ground.

Cut out the Blue Jays, colour them and glue them next to the trees where they will want to hide in the Winter on Page 2.

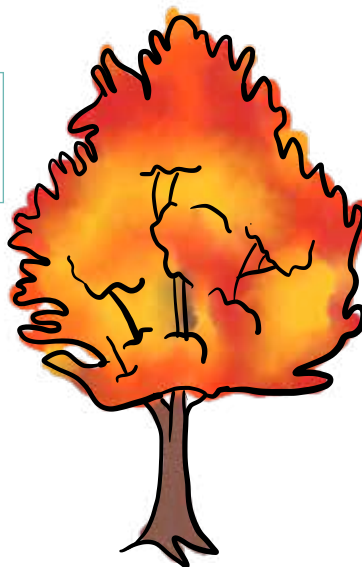

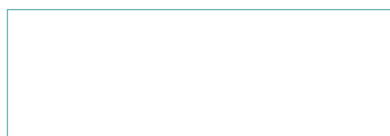

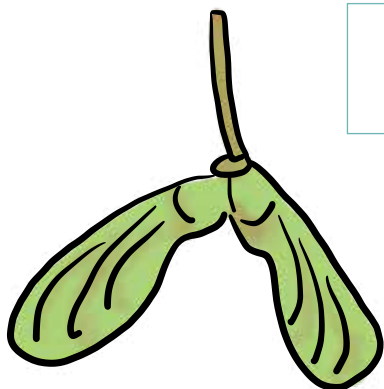

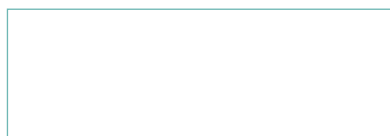

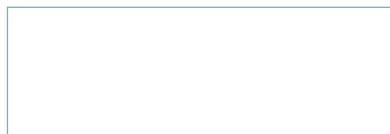

Take a walk and count the trees:

How many did you see? Don't forget to take a crayon to write it down.

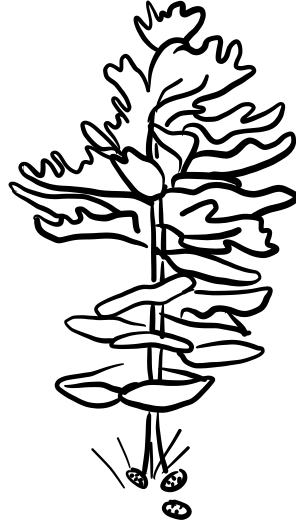

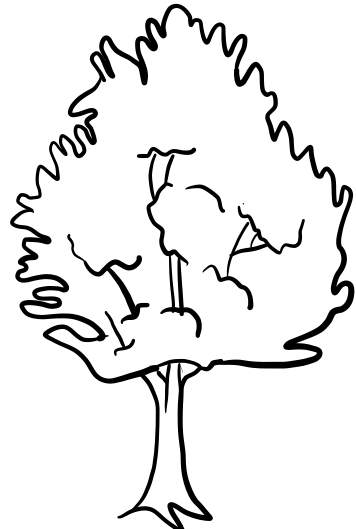

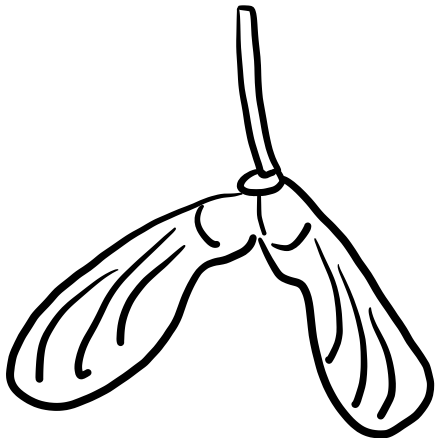

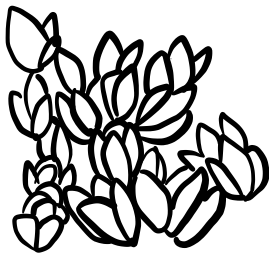

Cedar

Pine

Maple

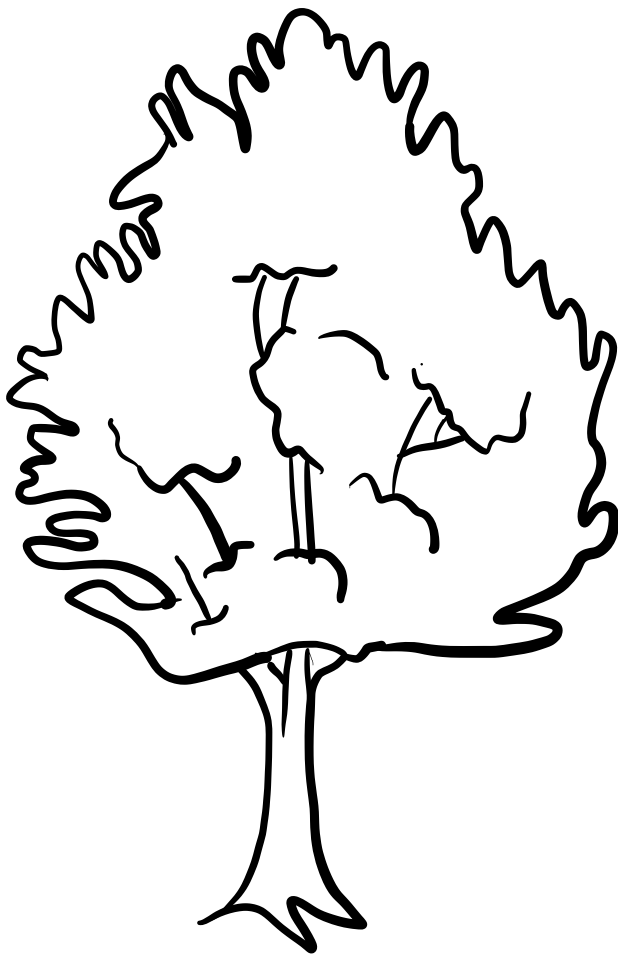

Draw a line from the seed to the right tree. Colour in the trees and seeds.

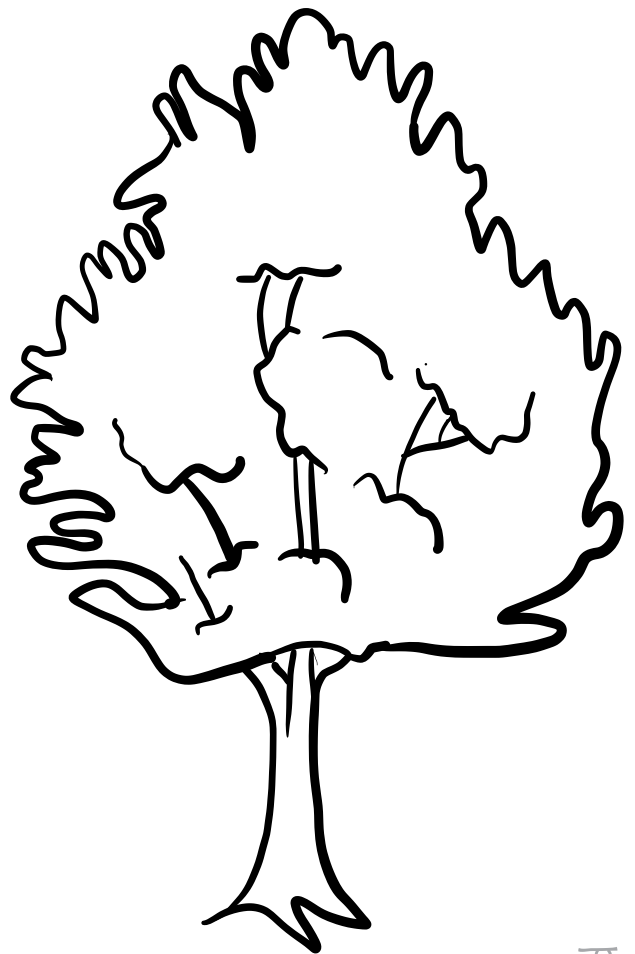

Colour these trees depending on the season:

Fall

Summer

Can you write the name of this tree?
